- English

PROFILE

I am a Backend Software Engineer with over 3 years of experience in developing and maintaining scalable applications using Java and Quarkus. I am proficient in deploying cloud-based solutions on Microsoft Azure and optimizing CI/CD pipelines with GitHub Actions. I am used to working with Agile Scrum teams and am passionate about solving complex coding challenges. I am committed to continuously improving my technical skills and adept at delivering efficient, high-quality software solutions while embracing new challenges. In my free time, I like to stay active by playing basketball and hitting the gym.

WORK EXPERIENCE

Critical Tehcworks

SEP 2022 - NOW

Software Developer

- Developed and maintained scalable RESTful API backend applications using Java and Quarkus, enabling seamless data exchange and integration across multiple systems.
- Designed and implemented CI/CD pipelines using GitHub Actions.
- Deployed containerized applications on Microsoft Azure, optimizing system scalability and reliability for cloud-based operations.
- Integrated Angular applications with multiple Java backend services, streamlining communication between front-end and back-end systems to enhance overall functionality and deliver.
- Worked closely with a Scrum team to develop and deliver incremental updates, ensuring timely completion of sprint objectives and maintaining robust code quality.

EDUCATION

Bachelor of Software Engineer

2019-2022

Universidade Fernando Pessoa
