Summary

Java/Quarkus Backend Developer with 3+ years of experience designing and delivering scalable microservices, event-driven systems, and cloud-native solutions on Azure. Strong track record with Kubernetes, CI/CD, and observability, ensuring reliable, high-performance platforms in production.

Technical Skills

Languages: Java, Python (basic), TypeScript (basic).

Frontend: Angular.

Backend: Quarkus, REST APIs, Microservices, Event-Driven Architecture.

Cloud & DevOps: Azure, Kubernetes, Helm, Docker, KEDA, GitHub Actions, CI/CD.

Databases: Azure Cosmos DB, MySQL.

Observability: Prometheus, Grafana.

Testing: JUnit, Jest.

Professional Experience

Backend Software Developer | Critical Techworks | Porto, Portugal

Sep 2022 – Present

- Developed and maintained Java (Quarkus) microservices exposing REST APIs used by internal platforms for file processing and system integrations.
- Built CI/CD pipelines with GitHub Actions to build, test and deploy Dockerized microservices to Kubernetes clusters running on Microsoft Azure.
- Implemented autoscaling strategies for batch workloads using KEDA, dynamically scaling Kubernetes pods based on queue workload.
- Configured Prometheus metrics and Grafana dashboards to monitor microservices and trigger alerts for production incidents.
- Contributed to Angular frontend development, integrating features with backend APIs, while collaborating in Agile Scrum teams to deliver incremental releases and maintain production stability.
- Focused on backend architecture, cloud infrastructure, and event-driven systems to enhance overall system performance and reliability
- Optimized microservices for maintainability, observability, and full-stack integration within cloud-native environments.

Education

Bachelor in Computer Engineering

University Fernando Pessoa, Porto, Portugal

2019-2022

- **Focus:** Software Development, Full Stack Development, Cloud & DevOps.
- **Relevant coursework:** Algorithms, Data Structures, Databases, Software Engineering, Cloud Computing, Networking.
